How to Make Beautiful Flowers with

STUDIO TWELVE® FLOWER LOOMS

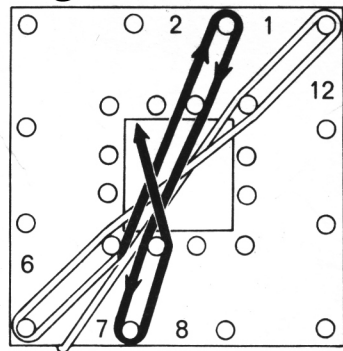

Downloaded from <http://www.knitting-and.com>

A Holding loom so that space #1 appears at the top, insert end of strand in slot at space #7. Working on outer circle of pegs (row A) only, lay strand across loom to space #1, around outer peg to space #6, around outer peg to

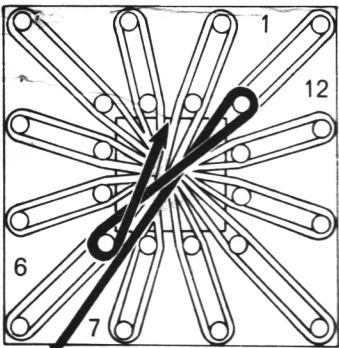

space #12, down to space #6, and around peg to space #7. This completes one loop and should form a "figure eight." Repeat this step four more times around the same pegs for a total of five loops.

B With strand at space #7 (working counter clockwise), lay strand across loom to space #2, around peg to space #1, down to space #7 and around peg to space #8. Repeat this step four more times around the same pegs for a total of five loops.

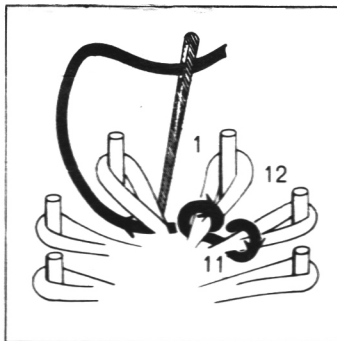

Continue stringing up the loom, putting five loops on every set of pegs, always moving counter clockwise with each change of position, until strand is at space #6.

Measure off 24 inches on the strand with which you are working and cut, leaving the 24 inch length attached to the flower and insert in slot. This will be used later in stitching center of flower.

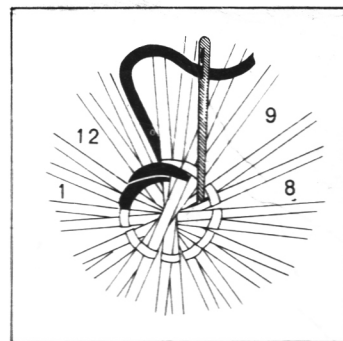

C The inner circle of petals is strung on in like manner, using the inner pegs (row B) only. String three loops of fiber on all pegs, following steps A and B. Cut strand from skein and insert in slot.

D Thread the 24 inch strand (left on outside row) into a sharp needle (yarn darning 14/18). With strand at space #6, stick needle through space to the back. (Do not pierce strand.) Bring needle up through space #12, pulling tightly against center of flower and down again at

space #11. This stitch will form a bar across the spoke. Again moving counter clockwise, bring needle up in space #1 and down in space #12. Continue this back-stitch until every spoke has a cross-bar, keeping the stitch firm and as close to center as possible. When circle is completed, strand should be at back of loom in space #10.

E The slanted finishing stitch is worked clockwise. Bring needle up at space #1, count 3 spokes to the right (between spaces #11 and

#10), then pierce center of spoke below crossbar, pulling needle through to the back. Bring needle up at space #12 and stitch into spoke between spaces #10 and #9. Bring needle up at space #11 and stitch into spoke between spaces #9 and #8. Complete center in this way, taking care to keep strand untwisted for smooth finish. The final two stitches should go under first slanted stitches made instead of through them. Remove flower from loom by gently pulling loops up from pegs.

To make single flower on either row A or B, string fiber on pegs as directed in steps A and B. Insert 24" length of contrasting strand used to stitch center in space #6 and follow steps E and F to stitch flower center.

Fiber needed for: Basic double flower made in 4 ply knitting worsted: 11 yds.
Single flower row A made in bulky yarn, 2 loops: 3 yds. 6".
Satin stitch center: 36" 4 ply knitting worsted.

Fibers that will make colorful flowers:

Strawtex®, Wool, Orlon or Acrylic Yarns; Cotton Rug Yarn, Bulky Yarns.
